

LEARJET 40XR

The Bombardier Learjet 40XR is a great leap forward in the light jet category. It clearly outperforms all other jets in its class with the best combination of range, speed and comfort. Carrying more people and more baggage farther and faster, this aircraft is setting the standard for what a light jet should be. With its exceptional climb rate, this aircraft gets you to 51,000 feet to soar well above other air traffic and bad weather. The Learjet 40XR boasts the tallest, widest and longest cabin of its class. Whether traveling for business or pleasure, the Learjet 40XR is sure to make a big impression.
